

POTTY DETECTIVE

What is it?

- The Wiggle Butt Academy way of cleaning up potty accidents before and during potty training

Why do it?

- We need to remove the chemicals that your dog's accidents have left behind so the smells don't trigger additional accidents

What do I need to get started?

- A black light, blue painter's tape, two different enzyme cleaners

Get Ready

- Any accident that is still wet should be absorbed with dry paper towels before beginning
- Any solid waste should be picked up and bagged or flushed

Procedure: Night 1

1. At night, with all the lights off in your home, walk through your house with your blacklight on. Shine it on the floor and different surfaces your dog may have marked.
2. If you see a spot that lights up, take a piece of blue painter's tape and mark the area by putting a piece of tape on it.
3. Continue until you have marked all spots that light up.
4. Turn the lights on and take one of your cleaners and clean the areas marked.

For Night 2, repeat the procedure using your second cleaner

THE TECHNIQUE
